Index 1975

SUBJECT

Alkenes, micro analysis by ozonolysis, 143
Atomic structure, 52
Audiovisual aids, 195

Books
A-level chemistry, 155
advanced practical, 89
air pollution, 26
analysis, 58
biochemistry, 57
chemical engineering, 186
Chemical manipulation, 120
coal, 58
crystals, 186
demonstrations, 57
electrophoresis, 186
energy, 121, 149, 150
experiment and theory, 89
Faraday, 88
fibres, 88
free radicals, 88
general, 26, 88, 186, 189
geochemistry, 87
industry, 122
information retrieval, 189
inorganic, 122
Inorganic complexes, 122
metals and alloys, 89
modern chemistry, 87
oil, 87
O-level chemistry, 87, 88, 150, 153
organic chemistry, 153
physical, 57, 149, 150, 189
practical, 121
principles, 57, 121
principles and applications, 26
radiation chemistry, 57
radiochemistry, 150
revision, 26
Science and policy: The international stimulus, 56
stereochemistry, 153
teaching, 149
technology, 26
text books, 58
titrimetry, 155
transition elements, 153
Bromine(I) chlorate(VII), dipyridine, 103

Calculators, simulated experiments, 75
Canada, chemical education in, 139
Catalysts, vanadium, sulphuric acid manufacture and, 81
Cement, high alumina, 106
Chemical bonds, 115
π bonding, 42
multiple, 42
Chemical reactions, oscillating, 144
Chromatography, project work, 110
Chromium(II) chloride, dihydrazine, 104
Chromium(III), EDTA complex, potentiometry, 12
Clay, swelling, 140

Disposal of toxic and hazardous chemicals, 182

Education
in Canada, 139
chemistry and, 108
research, 62, 94
in safety, 180
Employment, changing science courses and, 44
Examinations
instruction for, 116
papers, Open university, 119
Experiments, simulated, 75
Explosions, lithium, 3

Ferrocene, preparation, 6
Film reviews
Colour, 154
Carbon compounds, 27
Energy and bonding, 27
Evolution, 27
Fluorine, 27
Polymers, 27
Salt, 27
Science for the seventies, 27
Films, in teaching, 82
Fused salts, 84

Hazardous chemicals, disposal, 182
Hazards, laboratory, 80
Health and Safety at Work *etc* Act 1974, 166, 167, 170, 174
Hybridization, mathematical approach, 4
Hydrolysis, trioxalatocobaltate (III) ion, 54

Infrared spectroscopy, nickel (II) hexammines, 113

Kinetics, 40

Labelling,
ASE system, 178
chemical hazard warning, 175
Laboratories, hazards, 80
Learning aid, 14
Literature, 51
Lithium, explosions, 3

Microanalysis, alkenes, ozonolysis, 143
Microfiche, 158

Neutron activation analysis, silver, 85
Nickel(II) hexammine, infrared spectroscopy, 113

Open University, examination papers, 119
Oxidation states, unusual, experiments, 103
Ozonolysis, alkenes, microanalysis, 143

2,4-Pentanediol, 2-methyl-, preparation, 19
Periodic Table, 134
teaching, 14
Plumbate(IV) hexachloro-, pyridinium, 103
Pollution, 71
soil, 72
water, 16
Potentiometry, chromium(III)–EDTA complex, 12
Practical chemistry, fashions, 112
Projects, residential course for, 78
Protein, from new sources, 46

Safety
at work, Act, 166
communication in, 172
education in, 180
Salt museum, Northwich, 36
Salts, fused, 84
Schools, Health and Safety Act and, 168
Science fiction, 126
Science Teacher Education Project, and safety, 167
Silver, analysis by neutron activation, 85
Silver(II), tetrapyridine, peroxodisulphate(VI), 103
Soil, pollution, 72
Sulphuric acid, vanadium catalysts in manufacture, 81

RIC code of practice, 174

Teachers, Health and Safety Act and, 168
Teachers' centres, 76
Teaching
aims 39
films in, 82
in-service needs, 136
Periodic Table, 14
theory in, 8, 48
Toxic chemicals, disposal, 182
Trioxalatocobaltate(III) ions, acid hydrolysis, 54

Universities, Health and Safety Act, and, 170

Vanadium catalysts in sulphuric acid manufacture, 81

Water, pollution, 16
Work, Health and Safety at, Act 166
